

Flow 1 - Incident Analyzer

Steps

Instant trigger

1  New row added to  incidents 

2  Get shipment details

3  Get supplier details

4  AI risk analysis

A • Critical

B • High

C • Medium

D • Low / log only

5 If 4 final_severity is Critical

Trigger

New row added

New row added

Trigger a run when *

New row added

▼

Sheet *

 incidents

 

Optional filters

▼

Only for recently created items that meet these conditions

+

Add filter

Step 2

Get shipment details

Get shipment details

Sheet *

shipments

Rows to return *

A single row

Identify the row

Define the fields that identify the row in Google Sheets.

= shipment_id

Is exactly

1

Row

shipment_id

AND

OR

Behavior

Decide what Relay.app should do if

No rows are found *

Continue without a result

Step 3

Get supplier details

Get supplier details

Sheet *

suppliers

Rows to return *

A single row

Identify the row

Define the fields that identify the row in Google Sheets.

= supplier_id

Is exactly

2

Row supplier_id

+ AND

+ OR

Behavior

Decide what Relay.app should do if

No rows are found *

Continue without a result

Step 4

AI risk analysis

AI risk analysis

Prompt

Give the model detailed instructions. Insert relevant data for context.

[See examples](#)

You are a supply chain risk analyst. Review the incident, shipment, and supplier data attached.

Tasks:

1. Re-evaluate the severity as one of: Low, Medium, High, Critical.
2. Explain the likely business impact.
3. Decide the single required action.
4. Suggest concrete mitigation / recommendation steps.

Path A

Critical

Path A

Path name

Critical

Path rules

Set the rules that determine if Relay.app should follow path A.

AI risk analysis · final_severity

Is one of Critical

+ AND

+ OR

Step 6

Critical alert email

 Critical alert email

Send an email to yourself from notifications@relay.app. To email others, use e.g. our Gmail or Outlook Mail integrations.

Subject *

 CRITICAL Supply Chain Incident: 1  Row incident_id 

Body

Shipment: 1  Row shipment_id

Supplier: 3  Row supplier_name (3  Row country)

Severity: 4  final_severity

Impact:
4  impact

Action Required:
4  action

Recommendation:
4  recommendation

Path B

High

Path B

Path name

High

Path rules

Set the rules that determine if Relay.app should follow path B.

AI risk analysis · final_severity

Is one of High ×

+ AND

+ OR

Step 7

High alert email

High alert email

Send an email to yourself from notifications@relay.app. To email others, use e.g. our Gmail or Outlook Mail integrations.

Subject *

 HIGH Supply Chain Incident: 1  Row incident_id 

Body

Shipment: 1  Row shipment_id

Supplier: 3  Row supplier_name (3  Row country)

Severity: 4  final_severity

Impact:
4  impact

Action Required:
4  action

Recommendation:
4  recommendation
